Vac-Traps

Combo Owners! Save time and cash! "Vac-Trap" is the Newest advancement in sewer cleaning in years!

Max-Life Presents the "Vac-Trap". A new Debris Trap that connects to the end of your suction tubes replacing the crown nozzle. Sitting at the bottom of the invert in the sewer manhole, the Vac-Trap fills with debris as water flowing through it. Once the trap is full, you'll see water backing up. Turn on the vacuum pump and suck up the contents then repeat the process. The Vac-Trap lets water flow downstream. Saves pump water and fuel by eliminating the need to run vacuum pump continuously. Greatly reduces decanting time! Available for 6" to 24". Fits 6" or 8" tubes.

Debris Catchers

Comes with 25' of Poly Rope. Available from 6" to 24"

Debris Catcher for use with Poles

Grit Catchers

Stops finer grit, black sand and smaller, loose debris.

Grit Catcher for use with Poles

Debris and Grit Catchers both can be used with Fiberglass Poles. Provides for positive action of positioning, raising and/or lowering these catchers in manholes.

Debris Catcher shown used with Poly Rope.

Versi-Clam

Knock down design, easily assembled from 6" to 25". One size can be used in different lengths. Ships UPS.
